CP84-1 Super-Soft Tanning Oil

INFORMATION SHEET

Super-Soft is a special tanning oil that has been developed at our studios. Super-Soft is one of the fastest ways to achieve an incredibly soft skin. Super-Soft contains specially formulated softening agents that act on all parts of the skin, deeply lubricating all the fibres of the hide. Super-soft works well with both rugs and skins for taxidermy - because of the full lubrication of the hide, the chance of shrinkage is dramatically reduced.

PREPARATION:

Shake well before use.

Remove the lid from the bottle of Super Soft Oil. Place the bottle of oil in a bath of boiling water for a few minutes to warm through. Replace the lid and shake thoroughly. Decant as much oil as is required to liberally coat the tanned skin.

APPLICATION:

Lay the tanned skin on a flat surface skin side up. Using a soft brush wet the surface of the skin with warm-hot water used to heat the bottle of oil. Apply the pre-heated oil. Brush the oil well into the skin surface. Fold the skin flesh sides together, leave for 24 hours and then hang to dry or mount in the normal way.

When the skin is almost dry pull and work the skin over a stake until supple.

NOTE:

Skins, once oiled, should not be dried in a spin dryer or hydro extracted.

ALL CHEMICALS ARE POTENTIALLY DANGEROUS KEEP AWAY FROM CHILDREN AND LABEL CONTAINERS CLEARLY

Snowdonia Mail Order Supplies have a policy of continual improvement so please ensure you are in possession of the latest issue of the Product Information sheet for the product you are planning to use.
