

Superior Tanning products for Professional use

Please read the instructions carefully.

It is important that each stage of the work is done as detailed and in the order shown, take time, do not rush the work. It will do no harm to leave the tanning systems on longer than recommended, but trying to cut down on the time will certainly be detrimental to the finished product.

K-TAN has been developed and tested over more than forty years and is the system currently in use on our premises.

K-TAN can be used to tan skins with the hair on up to the size of Red Deer, Calf, Sheep, Goat and will of course tan skins like Fox, Rabbit etc, When choosing the skins to be tanned, ensure that they are fresh and that the hair is firm and not inclined to "slip". Mould covered skins left un-salted for longer than 2/3 days in hot weather are usually found to be unsuitable for tanning.

Both the preparation stage and the finishing stage will have some influence on the quality of the finished work, therefore every effort should be made to be as thorough as possible with this work. Don't be discouraged if the first attempts at fleshing and softening are not what you would like them to be. Experience is the best way to become proficient at the work. We now strongly advise the use of CP84 Supa-Soft oil for the final stage when tanning a mammal skin due to the superior finish this product can offer. This product is available from www.snowdoniasupplies.co.uk

Keep chemicals away from children. As a precaution rubber gloves, an apron and eye protection should be worn when handling the solutions or skins whilst wet. Use a dust mask when decanting and mixing any of the enclosed powders.

You can store surplus solution in screw top polythene containers for use with your next batch of skins. There is enough in the K-TAN kit to tan two large sheep skins, or the equivalent area of any other type of skin. Use the ingredients adequately.

Should you require further information or advice please write using a stamped addressed envelope.

Yours Faithfully
